Integrated courses (IC), combining theory with practical components.

- (i) Theory sessions shall be conducted for 3 hours per week, while the practical sessions shall be conducted for 2 hours per week.
- (ii) Theory components shall be evaluated through both Continuous Internal Evaluation (CIE) and Semester End Examination (SEE).
- (iii) The practical component shall be assessed only through CIE.

The Mathematics/Chemistry courses shall be taught by a single faculty member per session, with no sharing of the course (subject) modules. The tutorial sessions for the mathematics course shall be conducted in the laboratory environment using Maxima/Mathematica/ Python/Scilab/MATLAB software to enhance computational understanding and application skills.

All students admitted to the engineering program have to complete **Applied Mathematics-I and Applied Mathematics-II** in I and II semesters by selecting the subjects prescribed for their stream, viz. CV, ME, EEE or CSE, under the heading Mathematics-I and Mathematics-II.

Those who have completed the chemistry course under the heading Applied Chemistry in I semester have to select the prescribed stream wise physics course under the heading Applied physics during II semester.

Engineering Sciences Courses-I (ESC-I): These courses are designed to broaden the technical knowledge of students beyond their core area of study. These courses enable students to gain a foundational understanding of engineering principles from other stream courses. Students are required to select and complete two courses that are not belong to their admitted program stream. For example, a student admitted to the any programme of the Civil Engineering stream should not select Introduction to Building Sciences but any other two. One course shall selected under ESC-I and another course under ESC-II. The two courses must be different from the other.

Communication Skills: This course shall be conducted in a laboratory environment

The **Student Induction Programme** (SIP), initiated by the All India Council for Technical Education (AICTE), is designed to help newly admitted students in technical institutions transition smoothly into the higher education environment. It aims to familiarize students with the institutional culture, foster connections with peers and faculty, and provide a foundation for holistic learning. Activities under SIP may include Physical Activities, Creative Arts, Universal Human Values, Literary Events, and Proficiency Modules. Lectures shall be by Eminent Personalities, Local Area Visits, Department/Branch Familiarization, and Innovation-related sessions.

27.08.2025/V9/HLKM/final Visvesvaraya Technological University, Belagavi

The first year of the Engineering programmes is composed of I semester, II semester and Summer Semester. SIP activities shall be scheduled in the afternoon sessions during the first week of class commencement of I and II semesters only.

The specific programmes to be conducted will be notified separately by the University via the academic calendar or through a separate notification.

AICTE Activity Points Requirement for BE/B.Tech. Programmes

As per AICTE guidelines (refer Chapter 6 – AICTE Activity Point Program, Model Internship Guidelines), in addition to academic requirements, students must earn a specified number of **Activity Points** to be eligible for the award of the degree. The points to be earned is:

- 1. **Regular students** admitted to a 4-year degree program must earn **100 Activity Points**.
- 2. Lateral entry students (joining from the second year) must earn 75 Activity Points.
- 3. **Students transferred** from other universities directly into the fifth semester must earn **50 Activity Points** from the date of entry into VTU.

These Activity Points are **non-credit** and will not be considered for **the SGPA/CGPA** or be used for **vertical progression**. However, earning Activity Points is mandatory for the **award of the degree**, and the points earned will be reflected on the **eighth semester Grade Card**.

If a student completes all the semesters (eight or six) at the end of the programme but fails to earn the required Activity Points, the eighth-semester Grade Card will be withheld until the requirement is fulfilled. Also, the degree will be awarded only after the Grade Card has been released.

The hours spent earning the activity points will not be counted for regular attendance requirements. Students can accumulate these points at any time during their program period, including weekends, holidays, and vacations, starting from the year of admission, provided they meet the minimum hours of engagement prescribed for each activity by AICTE.

Course Outcomes

CO1: Apply the concepts of multivariable calculus and vector calculus to compute derivatives, optimize functions, and analyze vector fields for applications in computer science engineering.

CO2: Solve system of linear equations and determine eigenvalues and eigenvectors using direct and iterative methods.

CO3: Apply the concepts of vector spaces and linear transformations to problems in computer science engineering.

CO4: Demonstrate the applications of computer science and allied engineering Science using modern ICT tools.

Module-1: Calculus

(8Hours Theory + 4Hours Tutorial)

Partial differentiation, total derivative, differentiation of composite functions, Jacobian, Statement of Taylor's and Maclaurin's series expansion for two variables. Maxima and minima for the function of two variables.

Module-2: Vector Calculus

(8Hours Theory + 4Hours Tutorial)

Scalar and vector fields, Gradient, directional derivatives, divergence and curl - physica interpretation, solenoidal vector fields, irrotational vector fields and scalar potential.

Introduction to polar coordinates and polar curves.

Curvilinear coordinates: Scale factors, base vectors, Cylindrical polar coordinates, Spherical polar coordinates, transformation between cartesian and curvilinear systems, orthogonality.

Module-3: System of Linear Equations, Eigenvalues and Eigenvectors

(8Hours Theory + 4Hours Tutorial)

Elementary row transformation of a matrix, Echelon form, rank of a matrix. Consistency and solution of system of linear equations: Gauss elimination method, Gauss Jordan method. Applications: Traffic flow.

Eigenvalues and Eigenvectors, diagonalization of the matrix, modal matrix.

Module-4: Vector Space

(8Hours Theory + 4Hours Tutorial)

Vector spaces: definition and examples, subspace: definition and examples. Linear Combinations, linear span, linearly independent and dependent sets, basis and dimension, row space and column space of a matrix, Coordinates vector, inner products and orthogonality.

Module-5: Linear Transformation

(8Hours Theory + 4Hours Tutorial)

Definition and examples, algebra of linear transformations, matrix of a linear transformation. Singular, non-singular linear transformations and invertible linear transformations. Rank and nullity of linear transformations, Rank-Nullity theorem.

Teaching-Learning Process (Innovative Delivery Methods):

The following are sample strategies that educators may adopt to enhance the effectiveness of the teaching-learning process and facilitate the achievement of course outcomes.

- 1. In addition to the traditional lecture method, different types of innovative teaching methods may be adopted so that the delivered lessons shall develop students' theoretical and applied mathematical skills.
- 2. State the need for Mathematics with Engineering Studies and Provide real-life examples.
- 3. Support and guide the students for self–study.
- 4. You will also be responsible for assigning homework, grading assignments and quizzes, and documenting students' progress.
- 5. Encourage the students to group learning to improve their creative and analytical skills.
- 6. Show short-related video lectures in the following ways:
 - As an introduction to new topics (pre-lecture activity).
 - As a revision of topics (post-lecture activity).
 - As additional examples (post-lecture activity).
 - As an additional material of challenging topics (pre-and post-lecture activity).
 - As a model solution of some exercises (post-lecture activity).

Assessment Structure:

The assessment in each course is divided equally between Continuous Internal Evaluation (CIE) and the Semester End Examination (SEE), with each carrying 50% weightage.

The CIE Theory component consists of average of TWO IA tests for 25 marks and Continuous Comprehensive Assessments (CCA) for 25 marks.

- To qualify and become eligible to appear for SEE, in the CIE, a student must score at least 40% of 50 marks, i.e., 20 marks.
- To pass the SEE, a student must score at least 35% of 50 marks, i.e., 18 marks.
- Notwithstanding the above, a student is considered to have **passed the course**, provided the combined total of **CIE and SEE is at least 40 out of 100 marks**.

Continuous Comprehensive Assessments (CCA):

CCA will be conducted with a total of 25 marks. It is recommended to include a maximum of two learning activities aimed at enhancing the holistic development of students. These activities should align with course objectives and promote higher-order thinking and application-based learning.

Learning Activity-1: Tutorial: Practicing problems (Lab Activities/Surprise Test/ Seminar for 15 Marks) Execute the following lab exercises with the aid of any modern technological tool (Matlab/ Mathematica/ Scilab/ Python/ Maxima, etc).

Learning Activity-2: Assignments (Marks-10).

List of Lab Activities:

- 1) Finding partial derivatives and Jacobian,
- 2) Expansion of Taylor's and Maclaurin's series,
- 3) Finding Gradient, divergence and curl,
- 4) Finding rank, reduced echelon form, solving system of linear equations using Gauss elimination method,
- 5) Solving system of linear equations using Gauss-Seidel method,
- 6) Determine Eigenvalues and Eigenvectors,
- 7) Linearly Independence and Dependence sets,
- 8) Basis and dimension,
- 9) Linear transformation-range space and null space,
- 10) Verification of the rank nullity theorem.

Rubrics for Learning Activity (Based on the nature of learning activity, design the rubrics for each activity):

| | Superior | Good | Fair | Needs | Unacceptable |
|------------------|----------|------|------|-------------|--------------|
| | | | | Improvement | |
| Performance | | | | | |
| Indicator- 1 | | | | | |
| (CO/PO | | | | | |
| Mapping) | | | | | |
| Performance | | | | | |
| Indicator-2 | | | | | |
| (CO/PO | | | | | |
| Mapping) | | | | | |
| | | | | | |
| Performance | | | | | |
| Indicator-n | | | | | |
| (CO/PO | | | | | |
| Mapping) | | | | | |

Suggested Learning Activities may include (but are not limited to):

- Course Project
- Case Study Presentation
- Programming Assignment
- Tool/Software Exploration

- Literature Review
- Open Book Test (preferably at RBL4 and RBL5 levels)
- GATE-based Aptitude Test
- Assignment (at RBL3, RBL4, or RBL5 levels)
- Any other relevant and innovative academic activity
- Use of MOOCs and Online Platforms

Suggested Innovative Delivery Methods may include (but are not limited to):

- Flipped Classroom
- Problem-Based Learning (PBL)
- Case-Based Teaching
- Simulation and Virtual Labs
- Partial Delivery of course by Industry expert/ industrial visits
- ICT-Enabled Teaching
- Role Play

| Applied Chemistry for Smart Systems (C | Semester | I/II | |

| Total Hours of Pedagogy (Theory and Lab hours) | 60 | Total Marks | 100 |
| Credits | 04 | Exam Hours | 03 |
| Examination type (SEE) | Descriptive | | |

Course outcome (Course Skill Set)

At the end of the course, the student will be able to:

CO1: Understand the structure, synthesis, and applications of functional materials in memory and display devices.

CO2: Analyze quantum materials, conducting polymers, and their roles in energy and electronic systems.

CO3: Evaluate next-generation energy systems, fuel cells, and green hydrogen technologies.

CO4: Apply concepts of sensors, corrosion control, and green materials in sustainable electronics and e-waste management.

Module-1 Functional Materials for Memory and Display Systems

Memory Devices: Introduction, organic semiconductors; types of organic semiconductors used in memory devices, p-type semiconductor-pentacene and n- type semiconductor -perfluoropentacene, difference between organic and inorganic memory devices, construction, working and advantages of pentacene semiconductor chip.

Resistive RAM (ReRAM) Materials: Introduction, synthesis of TiO₂-RAM nanomaterial by sol-gel method, properties and its applications.

Display Systems: Introduction, liquid crystals (LCs)- classification, properties and its applications in Liquid Crystal Displays (LCDs), construction, working principle and applications of LEDs, OLEDs, Active Matrix Organic Light Emitting Diodes (AMOLEDs) and Quantum Light Emitting Diodes (QLEDs).

Number of Hours: 08

Module-2 Quantum Materials and Polymers

Quantum Dots: Introduction, size dependent properties -quantum confinement effect, surface-to-volume ratio & band gap, synthesis and applications of Cd-Se Quantum dots by wet chemical method, quantum dot sensitized solar cells (QDSSCs)-construction, working principle and applications.

Polymer: Introduction, molecular weight of polymers - number and weight average molecular weight of polymers, numerical problems, structure-property relationship of polymers, synthesis and properties of nylon-12 advantages in 3D printing applications, synthesis and properties of PVC and PMMA for device applications.

Conducting polymers- Introduction, synthesis of polyaniline, conductions mechanism and its engineering applications.

Number of Hours: 08

Module-3 Sustainable Chemistry for Energy Devices

Batteries: Introduction, basic overview of Nernst equation, concentration cell and numerical problems, classification of batteries, construction, working and applications of Li-Ion battery.

Next-Generation Energy Systems: Introduction, construction and working of sodium ion battery and redox flow battery for EV applications. Construction and working of ultra-small asymmetric super capacitor and its applications in IoT/wearable devices.

Clean Energy Chemistry: Introduction, fuel cell, difference between fuel cell and battery, construction, working principle, applications and limitations of solid-oxide fuel cell (SOFCs) and solar photovoltaic cell (PV cell). Production of green hydrogen by photocatalytic water splitting using TiO₂ method and its advantages.

Number of Hours: 08

Module-4 Chemical Sensors and Corrosion Control

Sensors: Introduction, terminologies- Transducer, Actuators and Sensors, working principle and applications- conductometric sensor and colorimetric sensor, electrochemical gas sensors for the detection of NOx & SOx in air sample, Biosensor-principle and working mechanism for detection of glucose in biofluids. **Corrosion:** Introduction, electrochemical theory of corrosion, types-differential metal and differential aeration corrosion, corrosion control- Galvanization and anodization, vapour corrosion inhibitors for protecting computer circuit boards, corrosion penetration rate (CPR)- definition, importance and numerical problems.

Number of Hours: 08

Module-5 Green Materials and E-Waste Management

Green Chemistry: Introduction, properties and applications of green solvents for server heat management, biosynthesis and properties of glycerol trioleate ester for server and IT infrasrtrure applications. Green synthesis of ZnO nanoparticles for magnetic Radio Frequency Identification (RFID) & Internet of Nano Things (IONT) system applications

Biomaterials: Introduction, synthesis and properties of polylactic Acid (PLA) and polyethylene glycol (PEG) for touch screen applications, synthesis and properties of Alginate Hydrogel for Brain-Computer Interfaces (BCIs) applications.

E-waste: Introduction, sources, composition of e-waste, effects of e-waste on environment and human health, Artificial intelligence in e-waste management and its applications, extraction of gold from e-waste by bioleaching method, direct recycling method of lithium-ion batteries.

Number of Hours: 08

PRACTICAL COMPONENTS OF IPCC

FIXED SET OF EXPERIMENTS

- **1.** Estimation of total hardness of water by EDTA method.
- 2. Determination of chemical oxygen demand (COD) of industrial effluent sample.
- **3.** Estimation of iron in TMT bar by diphenyl amine indicator method.
- **4.** Determination of alkalinity of given boiler water sample.
- **5.** Green synthesis of copper nanoparticles for conductive ink applications.
- **6.** Estimation of acid mixture by conductometric sensor (Conductometry).
- **7.** Estimation of iron in rust sample by Potentiometric sensor (Potentiometry).
- **8.** Determination of pKa of vinegar using pH sensor (Glass electrode).
- **9.** Estimation of copper present in e-waste by optical sensor (Colorimetry).
- **10.** Smartphone-Based colorimetric estimation of total phenolic content in coffee products.
- **11**. Data analysis of pka of a week acid and its interpretation using origin software.
- **12.** Chemical structure drawing using software: Chem Draw/ Chem Sketch.

Teaching-Learning Process (Innovative Delivery Methods):

The following are sample strategies that educators may adopt to enhance the effectiveness of the teaching-learning process and facilitate the achievement of course outcomes.

1. Project-Based Learning (PBL): Students gain knowledge by working on complex, real-world projects over time.

Example: Building prototypes, developing community solutions, research presentations.

2. Flipped Classroom: Students learn theoretical content at home (videos, readings) and engage in problem solving or discussions in class.

Assessment Structure:

The assessment for each course is equally divided between Continuous Internal Evaluation (CIE) and the Semester End Examination (SEE), with each component carrying **50% weightage** (i.e., 50 marks each).

The CIE Theory component will be 30 marks and CIE Practical component will be 20 marks.

The CIE Theory component consists of IA tests for 25 marks and Continuous Comprehensive Assessments (CCA) for 5 marks. The CIE Practical component for continuous assessments will be for 15 marks through rubrics and for lab tests will be for 5 marks.

- To qualify and become eligible to appear for SEE, in the **CIE theory component**, a student must score at least **40% of 30 marks**, i.e., **12 marks**.
- To qualify and become eligible to appear for SEE, in the **CIE Practical component**, a student must secure **a minimum of 40% of 20 marks**, i.e., **08 marks**.
- To pass the SEE, a student must secure a minimum of 35% of 50 marks, i.e., 18 marks.
- A student is deemed to have **successfully completed the course** if the **combined total of CIE and SEE** is at least 40 out of 100 marks.

Continuous Comprehensive Assessments(CCA):

CCA will be conducted for a total of 5 marks. It is recommended to include any one learning activity aimed at enhancing the holistic development of students. This activity should align with course objectives and promote higher-order thinking and application-based learning.

Learning Activity -1: (Marks- 5)

CIE Practical component:

The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report using a defined set of rubrics. Each experiment report can be evaluated for 30 marks. The summation of all the experiments marks to be scaled down to 15 marks.

The laboratory test (duration 03 hours) at the end of the last week of the semester /after completion of all the experiments (whichever is early) shall be conducted for 50 marks and scaled down to 5 marks. For laboratory test, the student is required to conduct one experiment each from both Part A and Part B.

Rubrics for Learning Activity (Based on the nature of learning activity, design the rubrics for each activity):

| Performance Indicator (CO/PO Mapping) | Superior | Good | Fair | Needs Improvement | Unacceptable |
|---|--|---|---|--|---|
| Performance Indicator 1 (CO1 - PO1, PO2, PO3, PO5, PO11) | Provides a comprehensive and insightful analysis of the structural, electrical, and optical properties of functional materials, with advanced applications in memory and display technologies. | Analyzes key properties of functional materials and explains their applications in memory and display systems. | Demonstrates a basic understanding of material properties and gives general applications in memory or display technologies. | Shows limited analysis of material properties; applications in memory and display systems are mentioned with minimal explanation. | Fails to analyze properties or applications of functional materials in memory and display technologies |
| Performance Indicator 2 (CO2 - PO1, PO2, PO3, PO5, PO11) | Demonstrates deep and clear understanding of the properties, behavior, and technological relevance of quantum materials and polymers. | Shows solid understanding of key concepts related to quantum materials and polymers. | Demonstrates a basic understanding of quantum materials and polymers. | Shows limited or unclear understanding of quantum materials or polymers. | Fails to demonstrate understanding of quantum materials and polymers. |
| Performance Indicator 3 (CO3 - PO1, PO2, PO3, PO6, PO11) | Effectively applies sustainable chemistry principles with innovative approaches to the design and development of energy storage and conversion devices. | Applies key sustainable chemistry principles in the development of energy storage and conversion systems. | Demonstrates basic application of sustainable chemistry concepts; shows general understanding of their role in energy device. | Provides minimal application of sustainable chemistry, weak link to energy storage and conversion devices. | Fails to apply sustainable chemistry principles; no relevance to energy storage or conversion device. |
| Performance Indicator 4 (CO4 - PO1, PO2, PO3, PO4, PO5, PO11) | Demonstrates advanced ability to design and critically evaluate chemical sensors and corrosion control methods with clear applicability to both industrial and environmental systems. | Clearly designs and evaluates chemical sensors and corrosion control methods, showing appropriate understanding of their industrial and environmental relevance. | Shows basic design and evaluation of chemical sensors or corrosion control methods with limited application details and minimal technical depth. | unclear design or evaluation; weak | Fails to design or evaluate relevant sensors or corrosion control methods; lacks understanding of industrial and environmental applications |
| Performance Indicator 5 (CO5 - PO1, PO2, PO3, PO4, PO6, PO11) | Thoroughly assesses a wide range of green materials and proposes innovative, effective strategies for e-waste reduction and management. | Clearly evaluates green materials and implements appropriate strategies for e-waste reduction and management with a solid understanding of sustainability concerns. | Demonstrates a basic assessment of green materials and outlines general e-waste management strategies, though lacking in depth. | Shows limited understanding of green materials or provides weak strategies for e-waste reduction with minimal practical relevance. | Fails to assess green materials or suggest meaningful e-waste management strategies & lacks awareness of sustainability. |

Rubrics for CIE - Continuous assessment:

| Performance Indicator (CO/PO Mapping) | Superior | Good | Fair | Needs Improvement | Unacceptable |
|---|--|--|---|--|--|
| Performance Indicator 1 (CO1 - PO1, PO2, PO3, PO5, PO11) | Provides a comprehensive and insightful analysis of the structural, electrical, and optical properties of functional materials, with advanced applications in memory and display technologies. | Analyzes key properties of functional materials and explains their applications in memory and display systems. | Demonstrates a basic understanding of material properties and gives general applications in memory or display technologies. | Shows limited analysis of material properties; applications in memory and display systems are mentioned with minimal explanation. | Fails to analyze properties or applications of functional materials in memory and display technologies |
| Performance Indicator 2 (CO2 - PO1, PO2, PO3, PO5, PO11) | Demonstrates deep and clear understanding of the properties, behavior, and technological relevance of quantum materials and polymers. | Shows solid understanding of key concepts related to quantum materials and polymers. | Demonstrates a basic understanding of quantum materials and polymers. | Shows limited or unclear understanding of quantum materials or polymers. | Fails to demonstrate understanding of quantum materials and polymers. |
| Performance Indicator 3 (CO3 - PO1, PO2, PO3, PO6, PO11) | Effectively applies sustainable chemistry principles with innovative approaches to the design and development of energy storage and conversion devices. | Applies key sustainable chemistry principles in the development of energy storage and conversion systems. | Demonstrates basic application of sustainable chemistry concepts; shows general understanding of their role in energy device. | Provides minimal application of sustainable chemistry, weak link to energy storage and conversion devices. | Fails to apply sustainable chemistry principles; no relevance to energy storage or conversion device. |
| Performance Indicator 4 (CO4 - PO1, PO2, PO3, PO4, PO5, PO11) | Demonstrates advanced ability to design and critically evaluate chemical sensors and corrosion control methods with clear applicability to both industrial and environmental systems. | Clearly designs and evaluates chemical sensors and corrosion control methods, showing appropriate understanding of their industrial and environmental relevance. | Shows basic design and evaluation of chemical sensors or corrosion control methods with limited application details and minimal technical depth. | Provides minimal or unclear design or evaluation; weak understanding of applications in industrial or environmental contexts. | Fails to design or evaluate relevant sensors or corrosion control methods; lacks understanding of industrial and environmental applications |
| Performance Indicator 5 (CO5 - PO1, PO2, PO3, PO4, PO6, PO11) | Thoroughly assesses a wide range of green materials and proposes innovative, effective strategies for e-waste | Clearly evaluates green materials and implements appropriate strategies for e-waste reduction and management with a solid understanding | Demonstrates a basic assessment of green materials and outlines general e-waste management strategies, though lacking in depth. | Shows limited understanding of green materials or provides weak strategies for e-waste reduction with minimal practical relevance. | Fails to assess green materials or suggest meaningful e-waste management strategies & lacks awareness of sustainability. |

| reduction | and | of sustainability | | |

Suggested rubrics for Practical continuous assessment:

| Performance | Excellent | Very Good | Good | Satisfactory |
|---|--|---|--|---|
| Fundamental Knowledge (4) (P01) | The student has well depth knowledge of the topics related to the course (4) | Student has good knowledge of some of the topics related to course (3) | Student is capable of narrating the answer but not capable to show in depth knowledge(2) | Student has not understood the concepts clearly (1) |
| Design Of Experiment (5) (PO2 & PO3) | Student is capable of discussing more than one design for his/her problem statement and capable of proving the best suitable design with proper reason (5) | Student is capable of discussing few designs for his/her problem statement but not capable of selecting best(4) | Student is capable of discussing single design with its merits and demerits(3) | Student is capable of explaining the design (1-2) |
| Implementation (8) (PO3 &PO8) | Student is capable of implementing the design with best suitable algorithm considering optimal solution. (7-8) | Student is capable of implementing the design with best suitable algorithm and should be capable of explaining it (5-6) | Student is capable of implementing the design with proper explanation.(3-4) | Student is capable of implementing the design. (1-2) |
| Result &Analysis (5) (PO4) | Student is able to run the program on various cases and compare the result with proper analysis. (5) | Student will be able to run the program for all the cases.(4) | Student will be able to run the code for few cases and analyze the output(3) | Student will be able to run the program but not able to analyze the output(1-2) |
| Demonstration (8) (P09) | The lab record is well- organized, with clear sections (e.g., Introduction, Method, Results, Conclusion). Transitions between sections are smooth. (7-8) | The lab record is organized, with clear sections, but some sections are not well-defined. (5-6) | The lab record lacks clear organization or structure. Some sections are unclear or incomplete. (3-4) | The lab record is poorly organized, with missing or unclear sections. (1-2) |

Note: Can add Engineering & IT tool usage based on the nature of the course

Suggested Learning Activities may include (but are not limited to):

- Course Project
- Case Study Presentation
- Programming Assignment
- Tool/Software Exploration
- Literature Review
- Open Book Test (preferably at RBL4 and RBL5 levels)
- GATE-based Aptitude Test
- Assignment (at RBL3, RBL4, or RBL5 levels)
- Any other relevant and innovative academic activity
- Use of MOOCs and Online Platforms

Suggested Innovative Delivery Methods may include (but are not limited to):

- Flipped Classroom
- Problem-Based Learning (PBL)
- Case-Based Teaching
- Simulation and Virtual Labs
- Partial Delivery of course by Industry expert/ industrial visits
- ICT-Enabled Teaching
- Role Play

| Introduction to AI a | Semester | I/II | |
|--------------------------------|--------------|-------------|-----|
| Course Code | 1BAIA103/203 | CIE Marks | 50 |
| Teaching Hours/Week (L:T:P: S) | 3:0:0:0 | SEE Marks | 50 |
| Total Hours of Pedagogy | 40 | Total Marks | 100 |
| Credits | 3 | Exam Hours | 3 |
| Examination type (SEE) | Theory | | |

Course outcome (Course Skill Set)

At the end of the course, the student will be able to:

- CO1: Explain the concepts and types of artificial intelligence.
- CO2: Illustrate basic machine learning methods for regression, classification and clustering.
- CO3: Identify real-world applications across different disciplines.
- CO4: Make use of prompt engineering techniques to interact with generative AI tools.
- CO5: Outline recent trends in artificial intelligence and machine learning.

Module-1

Introduction to Artificial Intelligence: Artificial Intelligence, How Does AI Work?, Advantages and Disadvantages of Artificial Intelligence, History of Artificial Intelligence, Types of Artificial Intelligence, Weak AI, Strong AI, Reactive Machines, Limited Memory, Theory of Mind, Self-Awareness, Is Artificial Intelligence Same as Augmented Intelligence and Cognitive Computing, Machine Learning and Deep Learning.

Machine Intelligence: Defining Intelligence, Components of Intelligence, Differences Between Human and Machine Intelligence, Agent and Environment, Search, Uninformed Search Algorithms, Informed Search Algorithms: Pure Heuristic Search, Best-First Search Algorithm (Greedy Search).

Knowledge Representation: Introduction, Knowledge Representation, Knowledge-Based Agent, Types of Knowledge.

Textbook 1: Chapter 1 (1.1-1.5), Chapter 3 (3.1-3.7.2), Chapter 4 (4.1-4.4)

Number of Hours: 08

Module-2

Introduction to Prompt Engineering, Introduction to Prompt Engineering, The Evolution of Prompt Engineering, Types of Prompts, How Does Prompt Engineering Work?, Comprehending Prompt Engineering's Function in Communication, The Advantages of Prompt Engineering, The Future of LLM Communication.

Prompt Engineering Techniques for ChatGPT, Introduction to Prompt Engineering Techniques, Instructions Prompt Technique, Zero, One, and Few Shot Prompting, Self-Consistency Prompt.

Prompts for Creative Thinking: Introduction, Unlocking Imagination and Innovation.

Prompts for Effective Writing: Introduction, Igniting the Writing Process with Prompts.

Textbook 2: Chapters 1, 3, 4 & 5

Number of Hours: 08

Number of Hours: 08

Module-3

Machine Learning: Techniques in AI, Machine Learning Model, Regression Analysis in Machine Learning, Classification Techniques, Clustering Techniques, Naïve Bayes Classification, Neural Network, Support Vector Machine (SVM).

Textbook 1: Chapter 2 (2.1-2.8)

Module-4

Trends in AI: AI and Ethical Concerns, AI as a Service (AIaaS), Recent trends in AI, Expert System, Internet of Things, Artificial Intelligence of Things (AIoT).

Textbook 1: Chapter 8 (8.1, 8.2, 8.4), Chapter 9 (9.1-9.3)

Number of Hours: 08

Module-5

Robotics, Robotics-an Application of AI, Drones Using AI, No Code AI, Low Code AI.

Textbook 1: Chapter 8 (8.3), Chapter 1 (1.7, 1.8, 1.10, 1.11)

Industrial Applications of AI: Application of AI in Healthcare, Application of AI in Finance, Application of AI in Retail, Application of AI in Agriculture, Application of AI in Education, Application of AI in Transportation, AI in Experimentation and Multi-disciplinary research.

Textbook 3: Chapter 3, Chapter 5 (5.1)

Number of Hours: 08

Teaching-Learning Process (Innovative Delivery Methods):

The following are sample strategies that educators may adopt to enhance the effectiveness of the teaching-learning process and facilitate the achievement of course outcomes.

- Flipped Classroom
- Problem-Based Learning (PBL)
- Case-Based Teaching

- Simulation and Virtual Labs
- ICT-Enabled Teaching
- Tool Demonstration

Assessment Structure:

The assessment in each course is divided equally between Continuous Internal Evaluation (CIE) and the Semester End Examination (SEE), with each carrying 50% weightage.

- To qualify and become eligible to appear for SEE, in the CIE, a student must score at least 40% of 50 marks, i.e., 20 marks.
- To pass the SEE, a student must score at least 35% of 50 marks, i.e., 18 marks.
- Notwithstanding the above, a student is considered to have **passed the course**, provided the combined total of **CIE and SEE is at least 40 out of 100 marks**.

Continuous Comprehensive Assessments (CCA):

CCA will be conducted for a total of 25 marks. It is recommended to include a maximum of two learning activities aimed at enhancing the holistic development of students. These activities should align with course outcomes and promote higher-order thinking and application-based learning.

Learning Activity -1: Practical Assignment on Creating Effective Prompts (Marks- 25)

INSTRUCTIONS:

- 1. Students must demonstrate the solutions to the course instructor and submit the record containing prompt creation (procedure), prompt execution and results with observations.
- 2. Course instructor must evaluate the student performance as per the rubrics.

| Sl. No | Activity on Creating Effective Prompts | | | | | |
|-----------|---|--|--|--|--|--|
| | ote: To conduct the activity students can use any of the AI tools such as ChatGPT. | | | | | |
| 1 | Basic Prompt writing: Create two different prompts to ask an AI about the topic "Electricity." The first prompt should be vague, and the second prompt should be clear and specific. Compare the responses you get and describe which prompt gave a better answer and why. | | | | | |
| 2 | Zero-Shot Prompting : Create a prompt that asks an AI to explain Ohm's Law without giving any example or background. Evaluate how well the AI explains the concept based on your prompt alone. | | | | | |
| 3 | One-Shot and Few-Shot Prompting: Provide the AI with a single example of how to calculate the resistance in a simple circuit. Then write your own prompt asking the AI to solve a similar resistance calculation. After that, add two more examples to your prompt and observe any changes in the AI's response quality. | | | | | |
| 4 | Chain-of-Thought Prompting: Develop a prompt that guides the AI step-by-step through calculating current flow in a circuit using Ohm's Law with resistors in series. Then, ask a final question for the AI to solve. Analyze how breaking down the reasoning steps impacts the accuracy of the answer. | | | | | |
| 5 | Prompt Refinement: Start with an ambiguous prompt related to the "Water Cycle." Test the Al's response, note the confusion or errors, and then refine your prompt to make it clearer and more specific. Repeat this process twice and record how the Al's responses improve with each refinement. Role-Based Prompting: Create three prompts asking the Al to explain "Newton's Laws of Motion," each with a different role instruction: (a) as an expert engineer, (b) as a high school teacher, (c) as a beginner. Compare the tone, detail, and style of the responses. | | | | | |
| 6 | Creative Engineering Problem Prompts: Craft a prompt that asks the AI to brainstorm ideas for designing a low-cost water purification system suitable for rural areas. Encourage creativity by adding phrases like "limited resources" and "sustainability". | | | | | |

| 7 | Ethical Prompt Design Discussion: Identify a biased prompt related to job descriptions (e.g. language |
|----------|--|
| ' | |
| | with respect to a gender). Rewrite the prompt to remove bias and create a neutral, inclusive version. |
| | Explain why this revision is more ethical. |
| 8 | Simulated Customer Support Chatbot: Develop a prompt that instructs the AI to play the role of a |
| | technical support agent helping a customer troubleshoot a failure in an electronic circuit. Include |
| | instructions to keep the tone friendly and professional and to ask diagnostic questions. |
| 9 | Multi-Language Prompting: Develop a prompt that asks the AI to translate a simple engineering glossary |
| | (5 technical terms) from English to your native language. Then modify the prompt to request additional |
| | explanations of these terms in the translated language. |
| 10 | Review a curated set of different prompt types (e.g., for summarization, information extraction, |
| | paraphrasing, question answering) from a "Prompt Gallery." For each prompt type, match it with a real- |
| | world task (e.g., summarizing a lecture note, extracting names from a project report). Test at least three |
| | prompt templates on an AI tool or by role-play (students simulate being the AI), with varied wording. |
| | Record the outcomes and discuss which prompt (or template) was most effective for each task, and |
| | explain why you think it worked best. Reflect on how changing small parts of a prompt can alter model |
| | response quality, completeness, or accuracy. |
| 11 | Choose a real engineering challenge or societal problem relevant to your field (e.g., "Reducing plastic |
| | waste in campus cafeterias" or "Optimizing solar panel placement on campus rooftops"). Draft an initial |
| | prompt that asks an AI to propose practical solutions. Share the AI's (or peer's) answer in small groups |
| | and identify aspects that are missing, vague, or not actionable. Refine your prompt based on feedback (e.g., |
| | specify constraints, ask for step-by-step solutions, or require a list of pros and cons). Repeat the process |
| | one more time, refining again for further clarity or specificity. Document the entire prompt-refinement |
| | process and share the best solution generated, along with a brief analysis of how prompt improvements |
| | led to better responses. |

Rubrics for Learning Activity (Creating Effective Prompts):

| Component | Outstanding | Exceeds | Meets | Needs | Unsatisfactory |
|---|---|---|---|---|---|
| & CO-PO | (5) | Expectations (4) | Expectations (3) | Improvement (2) | (1) |
| Mapping Appropriate Use of Prompting Technique [CO4] [PO1, PO5] Analysis & Comparison of Responses [CO1] | Demonstrates precise and creative application of the intended prompting technique (e.g., zero-shot, few-shot, role-based) with full alignment to objectives. Provides thorough, insightful, and well- supported analysis of AI responses, comparisons highlight key | Correctly applies the prompting technique with minor gaps or missed opportunities. Provides clear analysis with relevant comparisons, though slightly less detailed. | Uses the prompting technique, but with partial understanding or inconsistent application. Provides basic analysis with limited insight, comparisons are present but shallow. | Limited understanding of the technique; incorrect or weak application. Minimal analysis, comparisons are weak or incomplete. | No evidence of correct prompting technique use. No meaningful analysis or comparison. |
| [PO2, PO4] Creativity & Problem-Solving [CO3, CO5] [PO3, PO11] | highlight key strengths and weaknesses. Demonstrates outstanding creativity and innovation in crafting prompts, especially for problem-solving or design tasks. | Demonstrates creativity and some innovation; solutions are practical. | Shows moderate creativity; prompts are functional but not innovative. | Minimal creativity; prompts are repetitive or unimaginative. | No creativity or problem-solving is evident. |
| Ethical Awareness & Inclusivity [CO-5] [PO7] | Identifies biases clearly and revises prompts to be fully ethical, inclusive, and culturally sensitive. | Identifies some biases and revises prompts to improve inclusivity. | Attempts bias identification, but revisions are incomplete or partly effective. | Minimal effort is made to address bias; inclusivity not fully considered. | No consideration of bias or ethics is used in prompts. |
| Clarity & Specificity of Prompts, Documentati on & Reflection [CO1, CO4] [P08, P09, P011] | Prompts are self-explanatory, specific, and well-structured for the intended activity; no ambiguity is present. Documentation is complete, well-organized, and includes deep reflection on improvements across iterations. | Prompts are clear and mostly specific; minor ambiguity is present. Documentation is complete with some reflection on prompt refinement. | Prompts are somewhat clear but could be more specific; moderate ambiguity. Documentation is present but lacks detail or depth in reflection. | Prompts are vague and lack clarity; high ambiguity. Incomplete documentation, reflection is minimal. | Prompts are unclear, incomplete, or irrelevant to the activity. No documentation or reflection provided as per schedule |

Course outcome (Course Skill Set)

At the end of the course, the student will be able to:

- 1. Analyse basic electronic circuits using the principles of rectifiers, voltage regulators, and amplifiers.
- 2. Analyse the behaviour of analog circuits including oscillators and operational amplifiers in signal generation and conditioning applications.
- 3. Illustrate the fundamental concepts of analog and digital modulation techniques based on their characteristics and suitability for communication systems.
- 4. Interpret the structure and functionality of embedded systems and digital logic components such as microcontrollers, sensors, and logic gates.
- 5. Apply number system conversions and Boolean algebra to design and implement basic combinational logic circuits.

Module-1

Power Supplies: Block Diagram, Rectifiers, Reservoir and Smoothing Circuits, Improved Ripple Filters, Full Wave Rectifiers, Bi Phase Rectifiers Circuits, Bridge Rectifier Circuits, Voltage Regulators, Output Resistance and Voltage Regulation, Voltage Multipliers, (Only Voltage Doubler) Switched Mode Power Supplies.

Amplifiers: Types of Amplifiers, Gain, Input and Output Resistance, Frequency Response, Bandwidth, Phase Shift, Negative Feedback.

Text 1: Page No: 117-128, 139-146 Number of Hours:8

Module-2

Oscillators: Positive Feedback, Condition for Oscillations, Ladder Network Oscillator, Wein Bridge Oscillator, Single-Stage Astable Oscillator, Crystal Controlled Oscillators (Only Concepts, Working, and Waveforms. No Mathematical Derivations)

Operational Amplifiers: Operational Amplifier Parameters, Operational Amplifier Characteristics, Operational Amplifier Configurations, Operational Amplifier Circuits.

Text 1: Page No:179-186, 165-169, 171-175

Number of Hours:8

Module-3

Analog Communication Schemes: Introduction, Modern Communication System Scheme: Information Source and Input Transducer, Transmitter, Channel or Medium, Noise, Receiver, Concept of Modulation, Concept of Radio Wave Propagation (Ground, Space, Sky), Types of Communication Systems.

Modulation Schemes: Amplitude Modulation, Angle Modulation, Advantages of Digital Communication Over Analog Communication, Multiplexing, Digital Modulation Schemes: ASK, FSK, PSK, (Explanation with Waveform) Text 2: 1.1, 1.2, 1.3, 1.4, 1.5, 1.6, 1.9, 1.12, 1.15, 2.2.1, 3.2.1, 6.1, 6.11, 6.12, 6.13, 6.15, 6.16. Number of Hours:8

Module-4

Embedded Systems: Definition, Embedded Systems Vs General Computing Systems, Classification of Embedded Systems, Major Application Areas of Embedded Systems, Purpose of an Embedded System, Core of The Embedded System: Microprocessors, GPP Vs ASIP, Microcontrollers, Microprocessor Vs Microcontroller, DSP, RISC V/S CISC, Memory: ROM, Sensors, Actuators, LED, 7-Segment LED Display.

Text 3: 1.1, 1.2, 1.4, 1.5, 1.6, 2.1.1.1-2.1.1.6, 2.2.1, 2.3.1, 2.3.2, 2.3.3.1, 2.3.3.2.

Number of Hours:8

Module-5

Boolean Algebra and Logic Circuits: Binary Numbers, Number Base Conversion- Binary, Decimal And Octal and Hexa Decimal Numbers and Vice-Versa, Complements-1's and 2's, Basic Definitions, Basic Theorems and Properties of Boolean Algebra, Boolean Functions, Canonical and Standard Forms, Digital Logic Gates

Combinational Logic: Introduction, Design Procedure, Adders- Half Adder, Full Adder.

Text 4: 1.2, 1.3, 1.4, 1.5, 2.1, 2.3, 2.4, 2.5, 2.7, 4.1, 4.2, 4.3.

Number of Hours:8

Teaching-Learning Process (Innovative Delivery Methods)

The following are sample strategies that educators may adopt to enhance the effectiveness of the teaching-learning process and facilitate the achievement of course outcomes.

- 1. Lecture method (L) does not mean only the traditional lecture method, but a different type of teaching method may be adopted to develop the outcomes.
- 2. Show Video/animation films to explain the functioning of various analog and digital circuits.
- 3. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop thinking skills such as the ability to evaluate, generalize, and analyse information rather than simply recall it.
- 4. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.
- 5. Discuss how every concept can be applied to the real world and when that's possible, it helps improve the students' understanding.

Assessment Structure:

The assessment in each course is divided equally between Continuous Internal Evaluation (CIE) and the Semester End Examination (SEE), with each carrying 50% weightage.

- To qualify and become eligible to appear for SEE, in the CIE, a student must score at least 40% of 50 marks, i.e., 20 marks.
- To pass the SEE, a student must score at least 35% of 50 marks, i.e., 18 marks.

Notwithstanding the above, a student is considered to have **passed the course**, provided the combined total of CIE and SEE is at least 40 out of 100 marks.

Continuous Comprehensive Evaluation (CCE):

CCE will be conducted for a total of 25 marks. It is recommended to include a maximum of two learning activities aimed at enhancing the holistic development of students. These activities should align with course objectives and promote higher-order thinking and application-based learning.

Learning Activity 1: (Marks 25): Two assignments (for 10marks and 15marks) related to simulation of simple circuits (using any simulation tool such as LTSpice, KICad etc.), at RBL3, RBL4, or RBL5 levels, assignment reports should include circuit design, schematic, and simulation results.

Rubrics for Assignment

| | Superior | Good | Fair | Needs Improvement | Unacceptable |
|-------------------------|----------------|-----------------|-------------|----------------------|--------------------|
| Demonstrates an | Explains | Explains | Shows | Understanding is | Shows little or no |
| Understanding | simulation | simulation | basic | limited, with | grasp of the |
| of Simulation | concepts | concepts | understand | frequent errors or | simulation |
| Environment – 5 | clearly, | accurately with | ing of | confusion | concepts |
| marks | accurately, | minor gaps in | simulation | (2) | (2) |
| | and with | detail | concepts | | |
| | insightful | (4) | but lacks | | |
| | connections | | depth or | | |

| | | | (7) | | |

Suggested Learning Activities may include (but are not limited to):

- Learning Activity -1: Course Project
- Learning Activity -2: Open Book Test (preferably at RBL4 and RBL5 levels)
- Learning Activity -3: Assignment (at RBL3, RBL4, or RBL5 levels)
- Learning Activity -4: Any other relevant and innovative academic activity
- Learning Activity -5: Use of MOOCs and Online Platforms

Suggest Innovative Deliver Methods may include (but are not limited to):

- Flipped Classroom

- Problem-Based Learning (PBL)
- Case-Based Teaching
- Simulation and Virtual Labs
- Partial Delivery of course by Industry expert/ industrial visits
- ICT-Enabled Teaching
- Role Play

| PYTHON PROGRAMMING Semester I/II | | | | |
|---|---------------------|-------------|-----|--|
| Course Code | 1BPLC105B/205B | CIE Marks | 50 | |
| Teaching Hours/Week (L:T:P: S) | 3:0:2:0 | SEE Marks | 50 | |
| Total Hours of Pedagogy (Theory and Lab hours) | 40 + 24 (Practical) | Total Marks | 100 | |
| Credits | 4 | Exam Hours | 3 | |
| Examination type (SEE) | Theory | | | |

Course outcome (Course Skill Set)

At the end of the course, the student will be able to:

- CO1: Develop scripts using primitive language constructs of python.
- CO2: Identify the methods to manipulate primitive python data structures.
- CO3: Make use of Python standard libraries for programming.
- CO4: Build scripts for performing file operations.
- CO5: Illustrate the concepts of Object-Oriented Programming as used in Python.

Module-1

The way of the program: The Python programming language, what is a program? What is debugging? Syntax errors, Runtime errors, Semantic errors, Experimental debugging.

Variables, Expressions and Statements: Values and data types, Variables, Variable names and keywords, Statements, Evaluating expressions, Operators and operands, Type converter functions, Order of operations, Operations on strings, Input, Composition, The modulus operator.

Iteration: Assignment, Updating variables, the for loop, the while statement, The Collatz 3n + 1 sequence, tables, two-dimensional tables, break statement, continue statement, paired data, Nested Loops for Nested Data.

Functions: Functions with arguments and return values.

Chapters: 1.1-1.7, 2.1-2.12, 3.3, 4.4, 4.5

Number of Hours:8

Module-2

Strings: Working with strings as single things, working with the parts of a string, Length, Traversal and the for loop, Slices, String comparison, Strings are immutable, the in and not in operators, A find function, Looping and counting, Optional parameters, The built-in find method, The split method, Cleaning up your strings, The string format method.

Tuples: Tuples are used for grouping data, Tuple assignment, Tuples as return values, Composability of Data Structures.

Lists: List values, accessing elements, List length, List membership, List operations, List slices, Lists are mutable, List deletion, Objects and references, Aliasing, cloning lists, Lists and for loops, List parameters, List methods, Pure functions and modifiers, Functions that produce lists, Strings and lists, list and range, Nested lists, Matrices.

Chapter: 5.1, 5.2, 5.3

Number of Hours: 8

Module-3

Dictionaries: Dictionary operations, dictionary methods, aliasing and copying.

Numpy: About, Shape, Slicing, masking, Broadcasting, dtype.

Files: About files, writing our first file, reading a file line-at-a-time, turning a file into a list of lines, Reading the whole file at once, working with binary files, Directories, fetching something from the Web.

Chapter: 5.4, 6.1-6.5, 7.1-7.8

Number of Hours:8

Module-4

Modules: Random numbers, the time module, the math module, creating your own modules, Namespaces, Scope and lookup rules, Attributes and the dot Operator, Three import statement variants.

Mutable versus immutable and aliasing

Object oriented programming: Classes and Objects — The Basics, Attributes, Adding methods to our class, Instances as arguments and parameters, Converting an instance to a string, Instances as return values.

Chapter: 8.1-8.8, 9.1, 11.1

Number of Hours: 8

Module-5

Object oriented programming: Objects are mutable, Sameness, Copying.

Inheritance: Pure functions ,Modifiers, Generalization, Operator Overloading, Polymorphism.

Exceptions: Catching Exceptions, Raising your own exceptions.

Chapter: 11.2.2-11.2.4, 11.3.2-11.3.9, 12.1, 12.2

Number of Hours:8

PRACTICAL COMPONENTS OF IPCC

PART - A: FIXED SET OF EXPERIMENTS

- 1. a. Develop a python program to read 2 numbers from the keyboard and perform the basic arithmetic operations based on the choice. (1-Add, 2-Subtract, 3-Multiply, 4-Divide).
 - b. Develop a program to read the name and year of birth of a person. Display whether the person is a senior citizen or not.
- 2. a. Develop a program to generate Fibonacci sequence of length (N). Read N from the console.
 - b. Write a python program to create a list and perform the following operations
 - Inserting an element
 - Removing an element
 - Appending an element
 - Displaying the length of the list
 - Popping an element
 - Clearing the list
- 3. a. Read N numbers from the console and create a list. Develop a program to print mean, variance and standard deviation with suitable messages.
 - b. Read a multi-digit number (as chars) from the console. Develop a program to print the frequency of each digit with a suitable message.
- 4. Develop a program to print 10 most frequently appearing words in a text file. [Hint: Use a dictionary with distinct words and their frequency of occurrences. Sort the dictionary in the reverse order of frequency and display the dictionary slice of the first 10 items.
- 5. Develop a program to read 6 subject marks from the keyboard for a student. Generate a report that displays the marks from the highest to the lowest score attained by the student. [Read the marks into a 1-Dimesional array and sort using the Bubble Sort technique].
- 6. Develop a program to sort the contents of a text file and write the sorted contents into a separate text file. [Hint: Use string methods strip(), len(), list methods sort(), append(), and file methods open(), readlines(), and write()].

- 7. Develop a function named DivExp which takes TWO parameters a, b, and returns a value c (c=a/b). Write a suitable assertion for a>0 in the function DivExp and raise an exception for when b=0. Develop a suitable program that reads two console values and calls the function DivExp.
- 8. Define a function that takes TWO objects representing complex numbers and returns a new complex number with the sum of two complex numbers. Define a suitable class 'Complex' to represent the complex number. Develop a program to read N (N >= 2) complex numbers and to compute the addition of N complex numbers.
- 9. Text Analysis Tool: Build a tool that analyses a paragraph: frequency of each word, longest word, number of sentences, etc.
- 10. Develop Data Summary Generator: Read a CSV file (like COVID data or weather stats), convert to dictionary form, and allow the user to run summary queries: max, min, average by column.
- 11. Develop Student Grade Tracker: Accept multiple students' names and marks. Store them in a list of tuples or dictionaries. Display summary reports (average, topper, etc.).
- 12. Develop a program to display contents of a folder recursively (Directory) having sub-folders and files (name and type).

Teaching-Learning Process (Innovative Delivery Methods):

The following are sample strategies that educators may adopt to enhance the effectiveness of the teaching-learning process and facilitate the achievement of course outcomes.

- 1. Chalk and talk
- 2. PPT presentation
- 3. Demonstration
- 4. Problem-Based Learning (PBL)
- 5. Case-Based Teaching

Assessment Structure:

The assessment for each course is equally divided between Continuous Internal Evaluation (CIE) and the Semester End Examination (SEE), with each component carrying **50% weightage** (i.e., 50 marks each). The CIE Theory component will be 25 marks and CIE Practical component will be 25 marks.

The CIE Theory component consists of IA tests for 25 marks and Continuous Comprehensive Assessments (CCA) for 5 marks. The CIE Practical component for continuous assessments will be for 15 marks through rubrics and for lab tests will be for 5 marks.

- To qualify and become eligible to appear for SEE, in the **CIE theory component**, a student must score at least **40% of 30 marks**, i.e., **12 marks**.
- To qualify and become eligible to appear for SEE, in the **CIE Practical component**, a student must secure **a minimum of 40% of 20 marks**, i.e., **08 marks**.
- To pass the **SEE**, a student must secure **a minimum of 35% of 50 marks**, i.e., **18 marks**.
- A student is deemed to have successfully completed the course if the combined total of CIE and SEE is at least 40 out of 100 marks.

Continuous Comprehensive Assessments (CCA):

CCA will be conducted for a total of 5 marks. It is recommended to include any one learning activity aimed at enhancing the holistic development of students. This activity should align with course outcomes and promote higher-order thinking and application-based learning.

Learning Activity -1: (Marks-5)

Students must identify a real-life scenario and develop a Python-based solution using fundamental programming constructs/Data structures (Below given are the sample examples).

- 1. E.g.: Banking System: Simulate bank accounts using classes. Implement deposit, withdraw, and balance check using class methods. Create your own utility module.
- 2. E-commerce Cart System: Build a class Product, extend it with Electronics, Clothing using inheritance. Create a Cart class. Handle errors like invalid quantity using custom exceptions.
- 3. Smart Attendance System: Use file I/O to maintain logs, dictionaries for student info, and exception handling for invalid entries.
- 4. Develop/Simulate snake and ladder game by choosing suitable data structures of Python.

CIE Practical component:

The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report using a defined set of rubrics. Each experiment report can be evaluated for 30 marks. The summation of all the experiments marks to be scaled down to 15 marks.

The laboratory test (duration 03 hours) at the end of the last week of the semester /after completion of all the experiments (whichever is early) shall be conducted for 50 marks and scaled down to 5 marks. For laboratory test, the student is required to conduct one experiment each from both Part A and Part B.

Rubrics for Learning Activity (Based on the nature of learning activity, design the rubrics for each activity):

Note: Marks obtained (25) is scaled down to 5.

| Component & CO-PO Mapping | Outstanding (5) | Exceeds Expectations (4) | Meets Expectations (3) | Needs Improvement (2) | Unsatisfactory (1) |
|--|---|--|--|---|--|
| Identification of real-life problem and its relevance [CO1] [PO2] | Clearly defined and contextually relevant problem; innovative approach | Relevant and well-described problem | Partially relevant with limited context | Vague or not fully relevant problem | No identifiable or valid problem |
| Use of primitive constructs (variables, loops, functions, conditionals) [CO1] [PO1] | All constructs used correctly with proper logic and flow | Most constructs used properly | Basic constructs applied with some errors | Minimal construct usage with logical flaws | Incorrect or missing constructs |
| Manipulation of Python data structures (lists, tuples, dictionaries, sets) [CO2] [PO1] | Effective and optimized usage of Data Structures | Mostly appropriate usage | Some usage with basic understanding | Incorrect or limited use | Not used or misused entirely |
| Use of standard libraries and file operations (if applicable) [CO3, CO4] [PO5] | Libraries and file operations used correctly and meaningfully | Minor issues in usage | Limited or partially correct use | Attempted but faulty implementation | Not attempted or irrelevant |
| Code structure, modularity, and documentation [CO4] [PO9, PO11] | Modular, structured code with comments and output samples | Structured code with basic documentation | Limited comments or unclear structure | Poor documentation and readability | No documentation, disorganized code |

Rubrics for CIE - Continuous assessment:

| Component | Outstanding | Exceeds | Meets | Needs | Unsatisfactory |
|---|--|--|---|---|---|
| & CO-PO | (5) | Expectations | Expectations | Improvement | (1) |
| | | (4) | | | |
| Mapping Fundamental Knowledge: Understanding the problem statement [CO1-5] [PO1, PO2] Design of algorithm/flow chart and program [CO1-5] | The student has in depth knowledge of the topics related to the problem. Student is able to completely understand the problem definition. Student is capable of discussing more than one design for his/her problem | Student has good knowledge of some of the topics related to problem. Student is able to understand the problem definition. Student is capable of discussing few designs for his/her problem | Student is capable of narrating the answer but not capable to show in depth knowledge and the problem definition. Student is capable of discussing single design with its merits | Student has not understood the concepts partially. Student is able to partially understand the problem definition Student is capable of explaining the design. | Student has not understood the concepts and the problem definition clearly. Student is capable of explaining the design partially. |
| [PO2, PO3] | statement and capable of proving the best suitable design with proper reason. | statement but not capable of selecting best. | and de-merits. | Chalantia | Chalantia |
| Implementation (Program coding) with suitable tools [CO1-5] [PO5, PO8] | Student is capable of implementing the design with best suitable language structure considering optimal solution/optimal efficiency. | Student is capable of implementing the design with best suitable language structure and should be capable of explaining it. | Student is capable of implementing the design with proper explanation. | Student is capable of implementing the design. | Student is capable of implementing the design with errors. |
| Program debugging and testing with suitable tools [CO1-5] [PO5, PO8] | Student is capable to compile and debug the program with no errors (syntax, semantic and logical). | Student is able to compile and debug the program with errors (syntax, semantic and logical) and rectified errors with full understanding of error descriptions. | Student is able to compile and debug the program with errors (syntax, semantic and logical) and rectified errors with partial understanding of error descriptions. | Student is able to compile and debug the program with errors (syntax, semantic and logical) and rectified errors with no understanding of error descriptions. | Student is able to compile and debug the program with errors (syntax, semantic and logical) and rectified errors with assistance. |
| Results & interpretation /analysis | Student is able to run the program on various cases and compare the | Student is able to run the program for all the cases. | Student is able to run the code for few cases and analyze the | Student is able to run the program but not able to analyze | Student is able to run the program but not able to verify the |
| [CO1-5] [PO4] | result with proper analysis. | | result. | the result. | correctness of the result. |
| Demonstration and | Demonstration | Demonstration | Demonstration | Demonstration | Demonstration |

COURSE OUTCOMES

- **CO1:** Build essential verbal, non-verbal, and phonetic communication skills for clarity and effectiveness.
- **CO2:** Use interpersonal skills in group discussions, presentations, and professional interactions.
- CO3: Apply formal writing, email etiquette, and creative content development for employability.
- **CO4:** Communicate effectively in digital platforms, following netiquette and academic integrity.
- CO5: Prepare job applications, resumes, and perform confidently in interviews.

UNIT 1 COMMUNICATION SKILLS (3 Hours)

Glimpses of Essential English for Engineers (General Overview). Communication Skills: Process, Verbal and Non-Verbal, Proxemics, Chronemics and Barriers. **Writing**: Word Classification – Parts of Speech, Sentence structures. **Speaking & Listening:** Listening to English Pronunciation – English Phonemes – Intelligible Accent – Speech Organs- Syllable Structures, Stress, Intonation, and Practice.

| | submissions and reflections. | | | | |
| | Video Submissions: Students submit videos of role plays or presentations | | | | |
| | for asynchronous review. | | | | |

UNIT 3 ENGLISH FOR EMPLOYABILTY (3 Hours)

Writing: Formal Letter writing (Enquiry, Order, and Complaint). Tenses – Reported Speech-Voice - Email Etiquettes, Structure, Writing and Responding to Emails. Paragraph Writing (Descriptive, Argumentative, Expository, Short Story, and Narrative), Blog Writing. Reading: Proof Reading (Spelling, Punctuation, Grammar). Error Identification Exercises. Speaking: Questions & Requests (non-Wh questions and Question tags).

| | Speaking Skills - Oral assessment rubric (intonation, clarity, accuracy) | | | | | |
| | Email simulator (Google Forms/Canvas/Docs template) | | | | | |

UNIT 4 ENGLISH IN DIGITAL WORLD (3 Hours)

Writing: Framing of search terms / keywords in search engines/ Commands for search on open AIs - Tools to support synchronous communication such as webinar platforms, and asynchronous communication such as forums and social media - Online communication - Types – pros and cons of online communication. Acceptable online roles and behaviours – Netiquettes - Etiquettes of social media. Problems and opportunities in handling digital resources -Tools to check grammar. Writing: Citing information accurately from source material - Plagiarism – Infringement, Importance of academic integrity.

CURRICULUM DESIGN

Pronunciation Phonology in the upper secondary English curriculum includes: diphthongs, consonants, consonant clusters, word stress, strong and weak forms of pronunciation, ellipsis, assimilation, linking, sentence stress, rhythm and intonation.

Vocabulary. Ther target vocabulary of around 600-800 vocabulary items at level 3. Upon completion of the unit, students must know around 2,500 vocabulary items.

Grammar Communicative competences at level 3 including relative clauses, conditional sentences (type 1 and 2), compound and complex sentences, simple present, present continuous, present perfect, past simple, past continuous, past perfect, future simple, future continuous, near future, conjunctions, modal verbs, phrasal verbs, passive voice, etc.

SPECIFIC OUTCOMES

| Themes | Topics | Communicative | Linguistic |
|---------------------|------------------------------------|-----------------------------|----------------------|
| | • | Competences | Knowledge |
| | Transition from school to | Listening | Pronunciation |
| Our Academic | engineering college | Understand and identify | Diphthongs |
| Journey | Choosing an engineering discipline | the main points of | Words with stress |
| | Student life and academic | dialogues, monologues of | (specials cases) - |
| | challenges | 330-350 words on | Words without |
| | | familiar topics regularly | stress |
| | Role of engineers in society | encountered in life, work, | Sentence stress, |
| Our Technical | Ethics in engineering | school, etc., within the | assimilation, |
| Society | Impact of technology on social | scope of the curriculum. | linking vowels with |
| | structures | Follow simple instructions | vowels |
| | Interdisciplinary collaboration | such as recipes, how to use | Question intonation |
| | | common utensils, etc. | (consolidation and |
| | | Listen and guess meanings | extension) |
| | Artificial intelligence and | (through the expressions | Homophones |
| Our Built and | automation | and feelings of the | Vocabulary |
| Natural Environment | Emerging technologies in | speakers) in familiar | Words related to |
| Our Future | engineering | monologues and | themes and topics |
| Innovations | Lifelong learning and professional | conversations in everyday | of higher |
| | development | life | proficiency. |
| | Entrepreneurship and start-ups in | Understand the main | Grammar |
| | engineering | points of news programs, | Present perfect |
| | The future of work in the tech- | broadcasts, interviews, | (consolidation and |
| | driven world | etc., on familiar topics | extension) |
| | | which are clearly | Past simple and past |
| | | delivered in simple | continuous |
| | | language, and with | Types on sentences: |
| | | illustrative images. | simple, compound |
| | | | and complex |

Speaking

- Pronounce clearly and relatively accurately
- Words with or without stress, sentence stress, assimilation, and liaison.
- Speak and interact with fellow speakers about familiar topics, express personal views and exchange information about the topics covered in the curriculum.

Reading

- Read and comprehend the main points, specific contents of a text of 380-400 words on current and familiar topics.
- Read and understand the argument flow of texts, identify main conclusions in texts using clear language.
- Read to find and summarize short texts of everyday use such as simple letters,
 brochures, using words and structures from the original texts.

Writing

- Write simple connected and coherent texts of 280-300 words; write short reports based
 on suggestions, providing factual information and reasons for the recommendations
 made in the reports; collect short information from several sources and summarize it.
- Complete (write/fill) administrative forms such as resumes, letter of application for employment, etc.
- Write composition texts

Upon successful completion of the upper secondary English curriculum, students will be able to:

- Use English as a communication tool through the four skills of listening, speaking, reading and writing to meet basic and practical communication needs on familiar topics related to college, recreational activities, career, etc.
- Continue to formulate and develop basic knowledge of English, including pronunciation, vocabulary and grammar; and through English, have more extensive understanding of the landscape, people and culture of English-speaking countries and other countries in the world.
- Use English to improve the quality of learning other subjects in the general education curriculum.
- Use English for further education or immediate employment upon completion level 6.
- Use a variety of learning strategies to manage learning time, apply information technology in learning and self-learning, consolidate self-learning and self-assessment

methodology and take responsibility for learning outcomes, and form lifelong learning habits.

Mapping Course Outcomes with Program Outcomes:

| Course | | Program Outcomes* | | | | | | | | | | |
|----------|-----|-------------------|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| Outcomes | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
| 1 | | | | | | | | | 1 | 3 | | 2 |
| 2 | | | | | | | | | | 3 | | 2 |
| 3 | | | | | | | | | | 3 | | 2 |
| 4 | | | | | | | | | 1 | 3 | | 2 |
| 5 | | | | | | | | | 1 | 3 | | 2 |

Course Assessment and Evaluation:

| | | What | To Whom | When/ Where (Frequency in the course) | Max Marks | Evidence Collected | Contributing to Course Outcomes |
|-----------------------------|-------------|---|------------|--|--------------|--|---------------------------------------|
| Direct Assessment | C | Internal assessment tests | Students | Two Tests (Average of the two will be computed) | 25 | Blue books/Answer Scripts | 1 to 5 |
| | I E | Creative writing | Students | Assignment-1 (10) Assignment-2 (15) | 15+10= 25 | Quiz Projects Presentations Assignment Questions and Answers | 1 to 5 |
| nent Metho | | Case Analysis Surprise Quiz | Students | | | | |
| Indirect assessment Methods | S E E | Standard examination Students Feedback End of course Survey | Students | End of course (Answering 5 of 10 questions), 10 Case Studies 10 MCQs End of course | 30+10+ | Answer scripts Feedback Forms Questionnaire | 1 to 5 |

Questions for CIE and SEE will be designed to evaluate the various educational components (Bloom's taxonomy) such as:

CIE and SEE Evaluation:

| SL. No | Bloom's Category | Test 1 | Test 2 | Semester-End Examination |
|--------|---------------------|--------|--------|-----------------------------|
| 1 | Remember | 34% | 34% | 30% |

| 2 | Understand | 55% | 20% | 30% |
|---|------------|-----|-----|-----|
| 3 | Apply | 00% | 23% | 20% |
| 4 | Analyse | 11% | 00% | 10% |
| 5 | Evaluate | 00% | 00% | 00% |
| 6 | Create | 00% | 23% | 10% |

Course Assessment Methods:

- Continuous Assessment of Skills: Assignments/Quiz/Presentations/Projects
- Written Tests
- End Semester Examination

Sample Rubric for Presentation

| Criteria | Excellent (2) | Good (1) | Needs Work (0) |
|----------------------------|---------------|----------|----------------|
| Self-awareness | ✓ | ✓ | ✓ |
| Goal clarity | ✓ | ✓ | ✓ |
| Communication & delivery | ✓ | ✓ | ✓ |
| Insight into opportunities | ✓ | ✓ | ✓ |
| Realistic challenges | ✓ | ✓ | ✓ |

Sample Rubric

Grammar & Writing Rubric (for Essays/Reports/Emails)

| Criteria | Excellent (5) | Good (4) | Satisfactory (3) | Needs Improvement (1-2) |
|--------------------------|---|--|--|---------------------------------------|
| Clarity and Structure | Well-organized, coherent, clear transitions | Organized with minor lapses in clarity | Understandable but lacks coherence | Difficult to follow, lacks structure |
| Language Use | Professional, precise, varied vocabulary | Clear, mostly appropriate language | Some awkward phrasing or repetitive vocabulary | Frequent errors, unclear language |
| Grammar and Punctuation | Virtually no errors | Few minor errors | Several errors affecting readability | Multiple errors impacting readability |
| Relevance & Depth | Thorough, detailed analysis | Solid analysis with minor gaps | Basic analysis, lacks depth | |

Model Question Paper Course – Communication Skills

- i) Answer the 10 marks MCQ compulsory questions from Part A. Each question carries one mark.
- ii) Answer compulsory 10 marks case study questions Part B.
- iii) Answer any five questions from Part C selecting one question from each unit. 6 marks each.

| Q. | No. | PART-A | CO's | LO | Marks | | | |
|----|-----|---|------------------------------------|-----------------|---------|--|--|--|
| | | Multiple choice questions. (Compulsory) | | | | | | |
| 1. | | Choose the correct option for the following. | C0 ₁₋₅ | LO ₁ | 10X1=10 | | | |
| | a. | What is the primary purpose of | f communication in engineering | g? | | | | |
| | | , |) To inform and collaborate | | | | | |
| | | |) To express personal opinions | | | | | |
| | b | Which of the following is consi | dered a barrier to effective cor | nmunica | ation? | | | |
| | | A) Clear articulation B |) Technical jargon | | | | | |
| | | C) Active listening | O) Open-ended questions | | | | | |
| | c. | In terms of English pronunciat | | rue for | | | | |
| | | engineers? | | | | | | |
| | | engineers: | | | | | | |
| | | A) Pronunciation is not important i | n technical communication. | | | | | |
| | | B) Clear pronunciation is essential | for avoiding misunderstandings. | | | | | |
| | | C) Engineers should only focus on | writing skills. | | | | | |
| | | D) Accents should be completely eliminated. | | | | | | |
| | d | d How many syllables are in the word "engineering"? | | | | | | |
| | - | | | | | | | |
| | | A) 2 B) 3 C) 4 D) 5 | | | | | | |
| | Δ. | Which of the following preposi | tions correctly completes the s | entence | "The | | | |
| | C. | report is due Friday"? | tions correctly completes the s | entence | IIIC | | | |
| | | report is due i riday : | | | | | | |
| | | A) in B) on C) at D) f | or. | | | | | |
| | f. | What is the past tense of the v | erb "to communicate"? | | | | | |
| | | A) Communicate B) Communicati | ng C) Communicated D) Commu | nicates | | | | |
| | g | Which of the following is an ex | ample of mother tongue influe | nce in E | nglish | | | |
| | | communication? | | | | | | |
| | | A) Using idiomatic expressions B) | Mispronouncing words due to nati | ve langu | age | | | |
| | | sounds | , | | | | | |
| | | C) Employing technical vocabulary | correctly D) Using varied sentence | e structi | ıres | | | |
| | h | In reading comprehension, wh | | | | | | |
| | | when reviewing technical docu | _ | J | | | | |
| | | A) Chimamaina fau manaual idaaa | D) Marsariaina all dataila | | | | | |
| | | A) Skimming for general ideas | B) Memorizing all details | | | | | |

| | | A) The engineer designs the project last ye | ar. B) The engineer design the | project nex | t year. | | | |
| | | C) The engineer will design the project nex | | | | | | |

Part - B (Co1-5) L3

Case Studies $(2 \times 5 = 10 \text{ Marks})$ (Answer both the questions. Each carry 5 marks.)

Case Study 1 – Communication Barriers

You are working in a multinational company where your team includes members from different cultural backgrounds. During a meeting, some members misinterpret instructions due to differences in communication styles and accents.

- Identify at least three barriers to communication in this scenario.
- Suggest three solutions to overcome them.

Case Study 2 - Workplace Scenario

In a technical presentation, a student uses too many slides filled with text, speaks in a monotonous tone, and rarely makes eye contact with the audience.

- Identify the issues with the presentation delivery.
- Suggest improvements for verbal and non-verbal communication.

PART-C

Answer ANY FIVE questions selecting ONE full question from each unit. (6X5=30)

| | | _ | | - | | |
|----|---|-----|-----|-----|--|--|
| | UNIT – I | | | | | |
| 1. | How can engineers ensure that their communication is considerate of the diverse backgrounds of their team members? Give two strategies you would implement. | | | | | |
| 2. | How do interpersonal skills complement technical skills in the engineering field? Provide examples of how these skills can work together in a project. | | | | | |
| | UNIT - II | | | | | |
| 3. | How does incorrect intonation impact the meaning of a sentence in technical discussions or job interviews? Illustrate with examples. | | | | | |
| 4. | Discuss the role of intelligible pronunciation in making communication clearer. Identify English sounds that are often mispronounced by non-native. | | | | | |
| | UNIT – III | | 1 | | | |
| 5. | 5. Use the following idioms with their figurative meanings and construct workplace place -related sentences: | | | | | |
| | a. Hit the nail on the head b. Back to the drawing board c. In hot water d. Think outside the box e. A blessing in disguise f. Burn the midnight oil | | | | | |
| 6. | Complete the sentences by filling in the blanks with suitable prepositions and articles. | CO3 | LO2 | (6) | | |
| | a. The team submitted the proposal manager before the end of the day. | | | | | |
| | b. She placed the confidential filedesk in the conference room. | | | | | |

| | c. Our office is located corner of Main Street and Park | | | | | | |
|-----|--|-----|-----|-----|--|--|--|
| | Avenue. | | | | | | |
| | d. He arrivedmeeting room just a few minutes late. | | | | | | |
| | e. We will launch the new productsecond quarter of the | | | | | | |
| | financial year. | | | | | | |
| | f. There was an errorfinal report, which needs | | | | | | |
| | immediate correction. | | | | | | |
| | | | | | | | |
| _ | UNIT – IV | 004 | 100 | (6) | | | |
| 7. | Complete the sentences by forming the correct word (noun, verb, | CO4 | LO2 | (6) | | | |
| | adjective, or adverb) from the word given in brackets. | | | | | | |
| | The manager gave a very | | | | | | |
| | a. The manager gave a very presentation on | | | | | | |
| | the new project. (inform) | | | | | | |
| | b. His in the final decision was minimal. (involve) | | | | | | |
| | · · · · · · · · · · · · · · · · · · · | | | | | | |
| | c. The engineers worked to meet the product launch deadline. (efficient) | | | | | | |
| | d. The software update led to a significant in | | | | | | |
| | system performance. (improve) | | | | | | |
| | e. She handled the client's complaint with great | | | | | | |
| | (professional) | | | | | | |
| | f. Innovation and creativity are key to in a | | | | | | |
| | competitive market. (succeed) | | | | | | |
| 8. | Fill in the blanks with the correct tense of the verb in brackets. | CO4 | LO2 | (6) | | | |
| | | | | | | | |
| | a. By the time the meeting started, the manager | | | | | | |
| | (prepare) all the necessary documents. | | | | | | |
| | b. I (work) on this report since morning, and I | | | | | | |
| | still have two sections to complete. | | | | | | |
| | c. The team (complete) the task before the | | | | | | |
| | deadline yesterday. | | | | | | |
| | d. While we (discuss) the new project, the | | | | | | |
| | client walked in unexpectedly. | | | | | | |
| | e. She usually (respond) to emails within an | | | | | | |
| | hour. | | | | | | |
| | f. If the supplier delivers on time, we (be) ready for the launch next week. | | | | | | |
| | UNIT - V | | | | | | |
| 9. | Identify three common challenges engineers face during oral | CO5 | LO2 | (6) | | | |
| ٥. | presentations and propose practical strategies to overcome them. | | | ` ' | | | |
| | presentations and propose practical strategies to overcome them. | | | | | | |
| 10. | How can voice modulation and body language enhance the | CO5 | LO2 | (6) | | | |
| | effectiveness of a public speech in a technical seminar? Give | | | | | | |
| | examples. | | | | | | |
| | | | | | | | |

| Indian Constitution and Engineering Ethics | | | | |
|--|--------------|-------------|-----|--|
| Course Code | 1BICO107/207 | CIE Marks | 100 | |
| Teaching Hours/Week (L: T:P: S) | 1:0:0 | SEE Marks | | |
| Total Hours of Pedagogy | 01Hours/Week | Total Marks | 100 | |
| Credits | 00 | Exam Hours | - | |

Course objectives: This course will enable the students

- 1. To know about the basic structure of the Indian Constitution.
- 2. To know the Fundamental Rights (FRs), DPSP's, and Fundamental Duties (FD's) of our constitution.
- 3. To know about our Union Government, political structure & codes, and procedures.
- 4. To know the State Executive & Elections system of India.
- 5. To learn the Amendments and Emergency Provisions, other important provisions given by the constitution.

Teaching-Learning Process

These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes and make Teaching –Learning more effective: Teachers shall adopt suitable pedagogy for effective teaching – learning process. The pedagogy shall involve the combination of different methodologies which suit modern technological tools.

(i) Direct instructional method (Low/Old Technology), (ii) Flipped classrooms (High/advanced Technological tools), (iii) Blended learning (Combination of both), (iv) Enquiry and evaluation based learning, (v) Personalized learning, (vi) Problems based learning through discussion.

Apart from conventional lecture methods, various types of innovative teaching techniques through videos, animation films may be adapted so that the delivered lesson can progress the students In theoretical applied and practical skills.

Module - 1

Introduction to Indian Constitution: The Necessity of the Constitution, The Societies before and after the Constitution adoption. Introduction to the Indian constitution, The Making of the Constitution, The Role of the Constituent Assembly. The Preamble of Indian Constitution & Key concepts of the Preamble. Salient features of India Constitution.

Module - 2

FR's, FD's and DPSP's: Fundamental Rights and its Restriction and limitations in different Complex Situations. Directive Principles of State Policy (DPSP) and its present relevance in our society with examples. Fundamental Duties and its Scope and significance in Nation building.

Module - 3

Union Executive : Parliamentary System, Union Executive – President, Prime Minister, Union Cabinet, Parliament - LS and RS, Parliamentary Committees, Important Parliamentary Terminologies. Supreme Court of India, Judicial Reviews and Judicial Activism.

Module - 4

State Executive & Elections, Amendments and Emergency Provisions: State Executive, Election Commission, Elections & Electoral Process. Amendment to Constitution (How and Why) and Important Constitutional Amendments till today. Emergency Provisions.

Module-5

Professional Ethics: Ethics & Values. Types of Ethics. Scope & Aims of Professional & Engineering Ethics. Positive and Negative Faces of Engineering Ethics. Clash of Ethics, Conflicts of Interest. The impediments to Responsibility. Trust & Reliability in Engineering, IPRs (Intellectual Property Rights), Risks, Safety and liability in Engineering.

Course outcome (Course Skill Set):

At the end of the course the student will be able to:

| CO1 | Analyse the basic structure of Indian Constitution. | |
|-----|---|--|
| CO2 | Remember their Fundamental Rights, DPSP's and Fundamental Duties (FD's) of our constitution. | |
| CO3 | know about our Union Government, political structure & codes, procedures. | |
| CO4 | Understand our State Executive & Elections system of India. | |
| CO5 | Remember the Amendments and Emergency Provisions, other important provisions given by the constitution. | |

Assessment Structure:

The assessment in each course is divided equally between Continuous Internal Evaluation (CIE) and the Semester End Examination (SEE), with each carrying 50% weightage.

- 1. To qualify and become eligible to appear for SEE, in the CIE, a student must score at least 40% of 50 marks, i.e., 20 marks.
- 2. To pass the SEE, a student must score at least 35% of 50 marks, i.e., 18 marks.
- 3. Notwithstanding the above, a student is considered to have **passed the course**, provided the combined total of **CIE and SEE is at least 40 out of 100 marks**.

Continuous Comprehensive Assessments (CCA):

CCA will be conducted for a total of 25 marks. It is recommended to include a maximum of two learning activities aimed at enhancing the holistic development of students. These activities should align with course objectives and promote higher-order thinking and application-based learning.

Learning Activity -1: (Marks-__)
Learning Activity -2 (optional): (Marks-__)

Suggested Learning Resources:

Textbook:

- 1. **"Constitution of India" (for Competitive Exams)** Published by Naidhruva Edutech Learning Solutions, Bengaluru. 2022.
- 2. "Engineering Ethics", M.Govindarajan, S.Natarajan, V.S.Senthilkumar, Prentice –Hall, 2004.

Reference Books:

- 1. "Samvidhana Odu" for Students & Youths by Justice HN Nagamohan Dhas, Sahayana, kerekon.
- 2. "Constitution of India, Professional Ethics and Human Rights" by Shubham Singles, Charles E. Haries, and et al: published by Cengage Learning India, Latest Edition 2019.
- 3. "Introduction to the Constitution of India", (Students Edition.) by Durga Das Basu (DD Basu): Prentice –Hall, 2008.
- 4. "The Constitution of India" by Merunandan K B: published by Merugu Publication, Second Edition, Bengaluru.

Rubrics for Learning Activity (Based on the nature of learning activity, design the rubrics for each activity):

| | Superior | Good | Fair | Needs | Unacceptable |
|-----------------|----------|------|------|-------------|--------------|
| | | | | Improvement | |
| Performance | | | | | |
| Indicator- 1 | | | | | |
| (CO/PO | | | | | |
| Mapping) | | | | | |
| Performance | | | | | |
| Indicator-2 | | | | | |
| (CO/PO | | | | | |
| Mapping) | | | | | |
| | | | | | |
| Performance | | | | | |
| Indicator-n | | | | | |
| (CO/PO | | | | | |
| Mapping) | | | | | |

Suggested Learning Activities may include (but are not limited to):

- Course Project
- Case Study Presentation
- Programming Assignment
- Tool/Software Exploration
- Literature Review
- Open Book Test (preferably at RBL4 and RBL5 levels)
- GATE-based Aptitude Test
- Assignment (at RBL3, RBL4, or RBL5 levels)
- Any other relevant and innovative academic activity
- Use of MOOCs and Online Platforms

$Suggested\ Innovative\ Delivery\ Methods\ may\ include\ (but\ are\ not\ limited\ to):$

- Flipped Classroom
- Problem-Based Learning (PBL)
- Case-Based Teaching
- Simulation and Virtual Labs
- Partial Delivery of course by Industry expert/ industrial visits
- ICT-Enabled Teaching
- Role Play

VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELAGAVI

"Jnana Sangama" Macche Belagavi - 590018

| Innovation & Design Thinking Lab Semester 1 | | | | |
|---|--|-------------|-----|--|
| Course Code: | 1BIDTL158 | CIE Marks | 50 | |
| Teaching Hours/Week (L:T:P: S) | 0:0:2 | SEE Marks | 50 | |
| Total Hours of Pedagogy | 2 (Full day of Saturday may be allotted) | Total Marks | 100 | |
| Credits | 1 | Exam Hours | | |
| Examination type (SEE) Practical/Presentation/Seminar | | | | |

Course Outcome (Course Skill Set) -

At the end of the course, the student will be able to:

- 1. Empathize with community problems and define meaningful challenges.
- 2. Apply design thinking principles and multidisciplinary skills to develop user-centric solutions.
- 3. Build and test basic prototypes using tools available in the Atal Idea/Tinkering Lab or Makers Space.
- 4. Pitch socially relevant ideas with scalable models.
- 5. Collaborate effectively in diverse teams.

Week 1, 2 & 3: Orientation and Team Formation

Week -1&2: Introduction to Social Entrepreneurship, Innovation and Design Thinking

Group discussion on What is Innovation vs Invention. Why Design Thinking is important.

Brief about **5 stages**: Empathize – Define – Ideate – Prototype – Test.

Week -3: Innovation warm-up activities, forming interdisciplinary teams, Instructions about Next week activities

Week 4–5: Empathy and Field Exploration

Week-4&5: Field (any public places of student's interest Eg- Village, Government Office, Industry. R&D institute, NGO etc) visits, stakeholder interviews and interaction. Recording all interaction through handwritten in activity book prescribed by the University.

Week 6, 7 and 8: Problem Definition

Week-6: Documentation, categorization and Group discussion on interactions and problems/challenges.

Week-7&8: Problem framing using "How Might We" approach, Identification of social problems and user insights through affinity Clustering and Problem Tree. Mention of clearly defined challenge statements.

Week 9, 10 &11: Ideation Sprint

Week-9&10: Presentation by teams on Defined Problems, Brainstorming interactions and Mind Mapping.

Week-10: Idea Filtering - Shortlist of creative, eco -friendly and feasible ideas. Selection of one Suitable IDEA for next process, Designing/Structuring of Prototype model.

VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELAGAVI

"Jnana Sangama" Macche Belagavi - 590018

Week 12, 13 &14: Rapid Prototyping using Atal Idea Lab/Makers Space

Week-12&13: Building low-fidelity and working models using tools like Arduino, 3D printers,: Digital fabrication, electronics kits and recycled materials

Week-14: User testing, Feedback collection, Iteration - Observation Notes, Feedback Forms (Designing a business model for impact and scalability, if possible) Preparation of Draft of social venture plan

Week 15 &16: Final Demo and Social Pitch

Innovation showcase, Poster display, Project pitching to jury

Presentation of the project with impact with assessment, prototype, and sustainability plan

Teaching-Learning Process (Innovative Delivery Methods)

- 1.Activity Based Learning
- 2. Group discussion, Presentations.
- 3. one faculty member shall be assigned to group of 60 students or one division.
- 4. Each group shall contain Min. 10 and Max. 15 students.
- 5. Nature of the group shall be multidisciplinary. (Group shall be formed by selecting students from all branches)

Assessment Structure:

The assessment in each course is divided equally between Continuous Internal Evaluation (CIE) and the Semester End Examination (SEE), with each carrying 50% weightage.

- To qualify and become eligible to appear for SEE, in the CIE, a student must score at least 40% of 50 marks, i.e., 20 marks.
- To pass the SEE, a student must score at least 35% of 50 marks, i.e., 18 marks.

Notwithstanding the above, a student is considered to have **passed the course**, provided the combined total of **CIE and SEE is at least 40 out of 100 marks**.

VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELAGAVI

"Jnana Sangama" Macche Belagavi - 590018

Continuous Internal Evaluation (CIE) -

CIE Marks allocation Parameters for Social Entrepreneurship, Innovation & Design Thinking using Atal Idea/Tinkering Lab or Maker Space

CIE Parameters (50 Marks)

| Sl. No. | CIE Component/Week | Marks | Description |
|------------|--|-------|---|
| 1 | Orientation Activities & Communication Skills | 5 | Participation in Week 1–3 orientation, communication and teamwork skill-building exercises. |
| 2 | Empathy & Field Exploration Documentation | 10 | Quality and completeness of field visit reflections, stakeholder interviews, and activity book. |
| 3 | Problem Definition and Framing | 10 | Clarity of challenge statements, use of "How Might We", Affinity Mapping, Problem Trees. |
| 4 | Ideation & Mind Mapping | 5 | Participation in brainstorming, mind mapping, idea filtering sessions. |
| 5 | Prototype Development & Iteration | 10 | Quality and creativity of prototype/model, user testing, feedback collection, iterations. |
| 6 | Final Presentation & Pitch | 5 | Project pitching, poster presentation, storytelling and scalability model. |
| 7 | Teamw <mark>ork, Journal, and</mark> Engagement | 5 | Peer and mentor evaluation of participation, teamwork, journal updates. |
| 8 | Total CIE marks | 50 | Final CIE marks to be considered |

^{*}Minimum to Qualify for SEE: 20 out of 50 in CIE
